Experienced technologist leveraging my design and technical skills along with my passion for user-centered processes, my goal is to consistently create intuitive and captivating user experiences across digital products.

WORK EXPERIENCE

Mailchimp Intuit — Software *Engineer III*

March 2020 - January 2024

- Modernizing features from legacy code to React.JS
- Integrating back-end data via controllers to front-end components
- API coding and communication within various product features
- Taking initiative owning and releasing features within the product
- Communicating with stakeholders for the lifecycle of releases
- Consistent pair-programming sessions

Mailchimp — Software *Engineer II*

June 2018 - March 2020

- Building the UI (ReactJS & DOJO) for features integrated within the app
- Provided documentation for legacy code and web accessibility
- Worked within a product team following the Agile methodology
- Included code for specific tracking and analytics for features.
- Took part in a teaching cohort. I served as a mentor to students in Software Development

Movement Mortgage — *Frontend Developer*

March 2016 - June 2018

- Developed and maintained websites and apps with VueJS
- Used external RESTFUL APIs for accessing JSON data
- Worked with backend frameworks such as Laravel PHP
- Worked with CMS systems such as Wordpress and Prismic
- Performed consistent testing with BrowserStack
- Highly experienced with responsive design and media queries.

Youth Digital — *Game Design Instructor*

March 2016 - June 2018

- Teaching middle school students the process of building 3d Games
- Topics include : level design, GUI, game mechanics and objectives, player progression and balance.
- Quickly learned Youth Digital's in-house game engine (Owl) and applied its theories as well as its practical applications to instruct students.
